Microsoft Purview DLP Lab - Getting Started Guide

Objective

This lab provides foundational knowledge and practical steps to create, configure, and test a Data Loss Prevention (DLP) policy using Microsoft Purview. It covers custom sensitive information types, keyword dictionaries, and regex expression handling.

Sections

1. Creating Custom Sensitive Information Types

2. Building a Keyword Dictionary

3. Importing and Testing Regex Expressions

4. Creating a DLP Policy Template

5. Validating Policy Enforcement with Screenshots

Resources Included

- Regex Expressions: `Regex_Custom_Sensitive_Information_Types.md`

- Keyword Dictionary: `financial_terms.txt`, `healthcare_terms.txt`

- DLP Policy Template: `DLP_Policy_Template_SAMPLE.xlsx`

- Screenshots: `Purview_Screenshot_1.png`, `Purview_Screenshot_2.png`, `Keyword_Dictionary_Import_Guide.png`

- GitHub Path: `grc-portfolio/purview-lab/` and `grc-portfolio/purview-keywords/`

Notes

- This lab is designed for users currently in training or onboarding with Microsoft Purview.

- You may not yet have access to the full environment. Screenshots and sample data help simulate real-world interaction.
